Secondary School
80%

Skills

- HTML, CSS, Java fullstack(ongoing).
- Problem Solving, Decision Making, Team building.

Projects

- **Hand gesture to speech conversion**
Hand gesture to speech conversion is an interdisciplinary field that combines computer vision, machine learning, and natural language processing to interpret hand gestures and translate them into spoken language. This technology aims to enhance communication, especially for people with speech or hearing impairment.
- **Li-fi Data Transmission**
LiFi (Light Fidelity) is a wireless communication technology that uses visible light, ultraviolet, or infrared to transmit data. It is a high-speed alternative to Wi-Fi and has the potential to revolutionize data communication by leveraging the light spectrum instead of radio waves.
